

# Welcome

## Fertility Law

IFLG was established to provide ART legal services exclusively — this is the only kind of law we practice.

We are honored that you are considering International Fertility Law Group to represent you as you begin the exciting journey of becoming a parent through assisted reproductive technology (“ART”).

We have helped thousands of intended parents achieve peace of mind knowing their families created via ART are legally secure.

## Creating Families

IFLG founder Rich Vaughn entered the practice of ART law following his own personal experience of becoming a parent via ART, inspired by a passion for helping others with similar hopes and dreams.

At IFLG, we know from both personal and professional experience that the process of creating a family via ART can be complex, confusing and even overwhelming. Our team of legal professionals is trained to listen to your questions and concerns, provide expert advice tailored to your circumstances, and guide you every step of the way, until you welcome your new baby into the world.
